

# HEM Dynamic

High resolution in-ear headphones

---

- **High Resolution certified - Studio-quality audio**
- **Impressive frequency range for rich bass and clear highs - 20Hz to 40,000 Hz**
- **Enhanced isolation and sound quality - Comply™ soft foam ear**
- **Built-in microphone and inline remote - Skip, pause and play songs as well as for calls, Alexa, Cortana, Siri and Google Assistant**

The High Resolution certified HEM Dynamic sets a new standard for accuracy, speed and comfort. Designed for music lovers these innovative in-ear headphones offer incredible audio reproduction. Using a balanced dynamic micro driver the HEM Dynamic in ear monitors reveal a wider frequency range for the ultimate listening experience.
